

# New lockup features to better manage vesting and lockups together

Customize lockup restrictions and run vesting and lockup schedules together in parallel.

Use either a smart contract or qualified custodian to enforce lockups.

Tax withholdings and cost basis tracking based on lockups.

**Your token plan**

**Vesting over time**

Jan 2024 Jan 2025 Jan 2026

Jan 1, 2026 Vesting 30 BAL

Portfolio value **\$100k** Total tokens **100,000**

0 tokens available to claim

**Token plan details**

Start date	Aug 13, 2022	Cliff length	0 days
Fully vested	Aug 13, 2026	Vesting cadence	Weekly

**Vest schedule**

Period	Status	Amount unlocking
Jan 21, 2022	Unlocked	30 BAL \$45.60 USD
Feb 28, 2022	Unlocked	30 BAL \$45.60 USD
Mar 30, 2022	Locked	30 BAL \$45.60 USD
Apr 30, 2022	Locked	30 BAL \$45.60 USD
May 28, 2022	Locked	30 BAL \$45.60 USD
Jun 30, 2022	Locked	30 BAL \$45.60 USD

**Lockup period**

A restricted period of time where stakeholders cannot sell or transfer their vested tokens

Lockup length: 12 months

Unlock tokens:  Equally over time,  Using a custom schedule

Lockup start date: Monday, October 1, 2023

Unlocking occurs: Every month

Start unlocking on: Same day as vest date

This plan's first unlock date will be on [date]

## How lockups and vesting work together

Token plans that have lockup periods after vesting occurs will be labeled as vested, but subject to lockup in the UI. Lockups stay in an escrow wallet, custodian vault, or smart contract until they unlock (to enforce the restriction of selling or transferring the tokens). After the tokens are unlocked, the tokens are sent to the stakeholder's wallet.
